## General information

---

Name: **Dispense**

Version: **1.0**

Publication date: **02-10-2017**

Status wikipage: **draf**

This FHIR profile is based on the 2017 version of the ZIB Dispense, which can be found on the [wiki \(https://zibs.nl/wiki/HCIM\\_Mainpage\)](https://zibs.nl/wiki/HCIM_Mainpage).

The ZIB Dispense is based on the building blocks designed the Dutch Mediation project. More information can be found here on the (Dutch) [wiki \(https://informatiestandaarden.nictiz.nl/wiki/Landingspagina\\_Medicatieproces\)](https://informatiestandaarden.nictiz.nl/wiki/Landingspagina_Medicatieproces) or for the complete dataset see [ART DECOR \(http://decor.nictiz.nl/medicatieproces/mp-html-20170601T173502/index.html\)](http://decor.nictiz.nl/medicatieproces/mp-html-20170601T173502/index.html)

## Concept

---

Medication supply describes the supply of a medicinal product to a specific patient (or the administerer or a representative), with the intention of it being used according to the included instructions (usually to honor the supply request in a medication prescription). Medication supply takes place when the patient (or any of the others listed above) physically receives the product.

## Purpose

---

Recording supply information can be an important step in drawing up an up-to-date medication profile.
