MedicationAdministrationAgreement

General information

Name: **AdministrationAgreement**

Version: **1.0**

Publication date: **02-10-2017**

Status wikipage: **draf**

This FHIR profile is based on the 2017 version of the ZIB MedicationUse, which can be found on the [wiki \(https://zibs.nl/wiki/HCIM_Mainpage\)](https://zibs.nl/wiki/HCIM_Mainpage).

The ZIB MedicationUse is based on the building blocks designed the Dutch Mediation project. More information can be found here on the (Dutch) [wiki \(https://informatiestandaarden.nictiz.nl/wiki/Landingspagina_Medicatieprocesses\)](https://informatiestandaarden.nictiz.nl/wiki/Landingspagina_Medicatieprocesses) or for the complete dataset see [ART DECOR \(http://decor.nictiz.nl/medicatieproces/mp-html-20170601T173502/index.html\)](http://decor.nictiz.nl/medicatieproces/mp-html-20170601T173502/index.html)

Concept

Administration of medication describes the actual administration of the medication. This can be simply swallowing a tablet, applying ointment or paste, or an infusion that takes a considerable amount of time. The administration can refer to a medication prescription, but can also refer to home medication.

Purpose

To precisely plan the medication to be administered in a chain of collaborating healthcare professionals, it is often best to have information on the most recent administrations of medication, food or blood products.
